

How to Use Your Insurance Claim Log

SKU LGL-004 • INSURANCE CLAIM LOG

What this workbook does

Tracks insurance claims filed against your underlying STR insurance policy (separate from Airbnb AirCover, which is OPS-002). Major events: storm damage, fire, theft, plumbing failure, liability claim. Records claim lifecycle from FNOL (First Notice Of Loss) through settlement, recovery \$ vs deductible, and lessons-learned.

First-time setup (10 min)

1. **Property Roster** — list properties + each property's policy info (carrier, policy #, deductible, coverage limits).
2. **Settings** — your typical claim-filing thresholds (most carriers don't want claims under \$5K; you absorb those out-of-pocket to protect future premiums).

Every claim

1. **FNOL stage** — incident happens, log:
 - Date of loss, property, type (storm / fire / theft / plumbing / liability / other)
 - Description, photos cloud links
 - First call to carrier date + claim #
2. **Adjuster stage** — carrier sends an adjuster:
 - Adjuster name + contact
 - Inspection date
 - Initial estimate
3. **Settlement stage:**
 - Settlement date + amount
 - Deductible applied
 - Net recovery (settlement – deductible)
4. **Lessons-learned column** — what could've prevented this? What policy gap was exposed?

Reading the outputs

- **Per-Claim Lifecycle View:** every claim's status (FNOL / Investigating / Approved / Denied / Settled)
- **Days-to-Settlement KPI:** rolling average. >60 days = pressure carrier or escalate to state insurance commissioner.
- **Recovery Rate:** total settled \$ ÷ total claimed \$. <60% = your evidence is weak; reference photos checklist.
- **Per-Property Claim History:** carriers raise rates after 2+ claims in 3 years — this surfaces which property is "hot" before renewal.

Quarterly review

- Claims pending >60 days: escalate
- Properties with 2+ claims in 3 years: flag for OPS-008 (Insurance Policy Tracker) review at next renewal — may need to switch carriers
- Lessons-learned: review for OPS-006 (Maintenance Log) preventive cadence updates

Disclaimer

Filing claims under threshold (e.g., \$3K damage with \$2.5K deductible) often costs more in future premium hikes than the settlement returns. The workbook helps you decide WHETHER to file — not just how to track.

Questions?

hello@thestrledger.com — real humans, fast replies.

Pair with: OPS-002 Damage Claim + AirCover Log (Airbnb-specific claims), OPS-008 Insurance Policy Tracker (the policies that back these claims), OPS-006 Maintenance Log (preventive maintenance reduces future claims).
