

How to Use Your Cleaning Cost per Turnover Tracker

SKU OPS-004 • CLEANING COST PER TURNOVER TRACKER

What this workbook does

Logs every turnover cleaning event with cost, hours, cleaner, and supplies used. Rolls up to *true cost per turnover* and *cleaning \$ per night* per property and across the portfolio. Surfaces outlier cleaners and properties where the cleaning cost has drifted upward.

The output feeds REV-001 Cleaning Fee Optimizer — you can't price the cleaning fee correctly without knowing what cleanings actually cost.

First-time setup (10 min)

1. Open tab **Property Roster** — list every property with target cleaning cost (your benchmark).
2. Tab **Cleaner Directory** — every cleaner / service you use, hourly rate or flat fee, contact info.
3. Tab **Settings** — your target \$ per night (typically \$8-15 depending on market).

Every turnover

1. Open the Cleaning Log. Log a row at the end of each turn:
 - Date, property, cleaner, hours, hourly rate (or flat fee), supplies cost (separate line), total
2. Optional: notes on issues (extra deep-clean needed, damage discovered, late finish).

Reading the outputs

- **Per-Property Roll-up:** \$ per turn, hours per turn, \$ per night (vs. nights between this turn and the previous one)
- **Per-Cleaner Roll-up:** average \$ per turn, drift from your target rate, on-time vs late completion
- **Outlier Flag:** any cleaning >25% over your target benchmark gets flagged. Investigate the row.

Quarterly review

Open the Quarterly tab. Look for:

- A property whose \$ per night is creeping up (cleaning cost outpacing your nightly rate — review whether the cleaning fee needs a bump)
- A cleaner whose rate has drifted +10%+ without a conversation (renegotiate or replace)

- A property with high turn-time (long average hours) — may need a checklist refresh (OPS-001) or a cleaner swap

Feeds REV-001

Once you have 90+ days of data, the workbook hands clean inputs (cleaning \$ per turn, average LOS, ADR) to REV-001 Cleaning Fee Optimizer. The optimizer recommends whether to charge separately or bundle the fee.

Questions?

hello@thestrledger.com — real humans, fast replies.

Pair with: OPS-001 Cleaner Turnover Checklist (the per-turn quality scorecard), OPS-006 Maintenance Log + Vendor CRM (broader vendor tracking), REV-001 Cleaning Fee Optimizer (the pricing decision this workbook informs).
