

How to Use Your Cleaner CRM + Payroll

SKU PAM-002 • CLEANER CRM + PAYROLL

What this workbook does

For Pro Pam (managing 10+ properties with a cleaning team). Combines: cleaner CRM (contact info, performance, certifications), turnover assignment log, payroll calculator (hourly + per-turnover + bonus), and 1099-NEC year-end summary auto-feeding TAX-003.

Solves: "I have 6 cleaners, 12 properties, 30 turnovers a week, and I'm trying to schedule all of this on a whiteboard."

First-time setup (45 min — yes, really)

1. Open tab **Cleaner Roster** — every cleaner / cleaning service:
 - Name, business name, contact, EIN/SSN (for 1099-NEC year-end)
 - W-9 on file? Y/N + W-9 received date
 - Hourly rate + per-turnover flat rate (some are one, some are both)
 - Properties certified to clean (some cleaners only do specific properties)
 - Performance score (1-5 from past work)
2. Tab **Property Roster** — list properties with cleaner-preference order (primary, backup, emergency).
3. Tab **Settings** — pay period (weekly / biweekly), payment method, bonus rules.

Weekly turnover assignment

1. Open the Assignment Calendar. For each turnover:
 - Property + date + check-in time
 - Pick cleaner (from cleaner-preference order). Workbook flags if the cleaner is double-booked.
 - Estimated hours, estimated supplies cost
2. After turnover: update actual hours, actual supplies, performance notes.

Payroll calculation (every pay period)

The Payroll tab auto-aggregates from the Assignment Log:

- Per cleaner: total turnovers, total hours, hourly pay, per-turnover pay, bonuses
- Total amount due per cleaner
- Print pay stubs OR ACH list ready for QuickBooks / Gusto / direct deposit

Year-end 1099-NEC

The 1099 Summary tab pulls every cleaner who received $\geq \$600$ in the calendar year. Outputs:

- Cleaner name + EIN/SSN + address
- Total paid in calendar year
- W-9 status (red flag if missing — chase before December 15)

This data feeds directly into TAX-003 1099-NEC Tracker for Form 1099-NEC filing.

When to scale to a SaaS

If you're managing 25+ properties with 10+ cleaners, the workbook starts straining. Consider Properly, Breezeway, or Turno. For 10-25 properties, this workbook + a calendar app is sufficient and saves \$50-150/mo in SaaS fees.

Questions?

hello@thestrledger.com — real humans, fast replies.

Pair with: PAM-001 Owner Reporting Dashboard (cleaning expense flows into owner P&L), OPS-001 Cleaner Turnover Checklist (per-turn quality), OPS-004 Cleaning Cost per Turnover Tracker (per-property cost analysis), TAX-003 1099-NEC Tracker (year-end 1099 filing).
