

STR Maintenance Checklist

Annual + seasonal recurring tasks for a short-term rental — preview release.

This is a placeholder version of the Maintenance Checklist — the recurring tasks an STR forgets until something breaks: HVAC filter, smoke detector batteries, deep clean cadence, fireplace inspection, water heater flush, gutter clear, exterior caulk audit.

The full version sequences tasks by month, by season, by climate zone, and cross-references the Maintenance schedule generator at strops.tools/maintenance-schedule.

Subscribe at strops.tools/maintenance-checklist for the full PDF.
